Did you share this Josh already? I am thinking he is the one who could tell us the utility of this.

Subject: Enviro Atlas and Gold King Mine support

Hey Anne!

Long time-no talk, huh? I tried to call you but your mailbox is full! I just wanted to touch bases with you about the email traffic concerning mapping support to the release. I'm waiting for an okay from the EOC before we proceed, but I think they'll like the additional data layers. I've already shared the slides you sent with the EOC GIS/imagery person and he liked the idea. He's not going to be available again until Monday.

I just wanted to give you a heads up that something may come of this and to keep an eye out.

Later,

Eric
